

SMALL BUSINESS (SB) LIAISONS

Warner Robins Air Logistics Complex (WR-ALC) Robins AFB, Georgia

Robins AFB is the largest industrial complex in Georgia, employing a workforce of over 21,864 civilian, contractor, and military members. With the recent reorganization within the Air Force Materiel Command to a 5-center construct, Robins AFB is designated as the Warner Robins Air Logistics Complex (WR-ALC) and includes local operating units for two of the five Centers: Air Force Sustainment Center (AFSC) headquartered at Tinker Air Logistics Complex, Air Force Life Cycle Management Center (AFLCMC) headquartered at Wright-Patterson AFB, and various mission partners such as HQ Air Force Reserve Command, Defense Logistics Agency (DLA) Distribution Warehouse, Defense Logistics Agency (DLA) Aviation, 116 Air Control Wing (ANG) (JSTARS), 461 Air Control Wing (Active Duty) (JSTARS), Marine Aircraft Group-49 Det A, 339 Flight Test Squadron (AFRC), 5 Combat Communications Group (CCG), etc.

The Air Force Sustainment Center (AFSC) operations here include the Warner Robins Air Logistics Complex (WR-ALC) covering Maintenance of aircraft, the 638 Supply Chain Management Group providing supply chain support to sustain weapon system readiness, and the 78th Air Base Wing which supports base operations.

The Air Force Life Cycle Management Center (AFLCMC) operations here are responsible for the total life cycle management of Air Force weapon systems, support the Program Executive Offices (PEOs), and were the former Aerospace Sustainment Directorates (old GR Directorates).

The Office of Small Business Programs located at the Warner Robins Air Logistics Complex (WR-ALC) reports to the Office of Small Business Programs at the Air Force Sustainment Center (AFSC) at Tinker Air Logistics Complex. The local Small Business office consists of small business and source development specialists to aid, counsel, and assist small businesses. Additionally, on the Robins AFB Office of Small Business Programs website (<http://www.robins.af.mil/library/smbus.asp>), you will find the Long-Range Acquisition Estimate (LRAE) and the Requirements Projections on the Web (RPOW) tools which communicate future mission requirements as a forecast of expected contract opportunities with industry. To facilitate these tools, there are small business liaisons assigned within the various wings and directorates as set forth below.
