

# Team Robins Personal Protective Equipment Focus Week March 13-17

**PPE – it's not just for the other guy**

# I DON'T NEED NO SILLY PERSONAL PROTECTIVE EQUIPMENT (PPE)!!!

**Okay, maybe I was wrong...**

**really, really wrong**

People would never think of doing these activities without proper personal protection,

**Fight a fire.**

**Go into space.**

**Fly a jet.**

**Suba dive**

**Play Hockey**

**Skydive**

**You wouldn't do these activities, without these safety devices and you would protect those you love**

**You will take time to put on hunting or fishing gear, the right shoes for golf, basketball, soccer and protection for going into battle or a riot, but**

**take one or two minutes to grab the right tools, put on eye, hearing or face protection and you don't have time.**

**You will wrap yourself in equipment to play sports, jump out of an airplane, dive deep under the ocean, but not take those few seconds to buckle your seat belt or put on a pair of safety glasses. WHY?? Is your life not that important when you are cutting down a tree, fixing the car or repairing the roof. It is those activities where more people die or are permanently disabled than any of the others.**

**One very important thing to remember is if you use PPE, but it is not the proper equipment for the job you might as well not bother to put it on.**

**Take that extra few seconds and save your...**

***Just make sure it is the right PPE for the job!***

**Yes, that is a gun in his ear.**

**RULE No. 5**  
**Always wear hearing protection**
